## RECEIVING \& SETUP

## PLATEN SURFACE

Slight surface imperfections are a normal part of the casting process for the platens on your press. These are not considered a defect and do not affect the functionality of the machine in any way.

## SHIPPING OR RETURNS

*NOTE* Save all of your shipping/ packing material. Do not risk costly shipping damage, ship only in original box.

1. Fasten machine to plywood shipping base with bolts provided
2. Tie or tape handle securely to base.
3. Place in original box, and put side liner and top liner in place. Fold flaps and seal the box. (Additional bottom boards, box, and liners may be obtained from your supplier for a nominal cost.)

## UNPACKING

Remember to save all packing material - including box, liner, and board. You may need these for shipping your machine

## INSPECTION

Inspect your machine for hidden shipping damage. Contact the delivery company immediately, should you find damage.

## INSTALLATION

1. Lift the press from skid and place on countertop. If you purchased a cart with your press, align legs with holes on top of the cart and bolts (supplied) fasten to cart. You will need a 9/16 wrench.
CAUTION: Heavy lifting can cause injury. We recommend two person lifting or use of a mechanical aid when handling this press. Remember to always maintain natural curves of back and bend knees to lift.
2. Plug the cord of the press into a correctly grounded electrical outlet. Th correct voltage is indicated on the identification tag of the press.
NOTE: Upon receiving your new equipment, some debris or residue may be present on the aluminum platen(s). Clean the platens per the instructions provided prior to first use.
3. Remove wrap from handles and platens.

WARNING: Do not use an extension cord to supply power to your press.
4. (Air models only) - Supply a clean (void of oils) and dry (void of water) air source of 110-130 P.S.I. (7-8 bar) to the $1 / 4^{\prime \prime}$ NPT air inlet located on the back panel of the machine. Requires 1 CFM ( $30 \mathrm{~L} / \mathrm{min}$ ). It is strongly recommended that an external air filter and water trap be installed at the machine's air inlet connection. This equipment has small valves and ports that can be blocked from moisture and residue in compressed air causing it to malfunction. Damages to the equipments internal air operated components resulting in unfiltered air not covered under warranty. Combination air/water traps are available at any major hardware store or may be purchased directly from doughXpress® (part \#71145).

## POWER

## TURNING THE POWER "ON"

1. Once the machine is plugged into power, the display will show a "Red Icon" as shown below. To turn the power on to the machine, simply press the Red Icon.

2. The display will then come on and look similar to what is shown below.

To turn the Power "OFF" to the machine, simply press the Green "Power" Icon in the upper right corner of the display and the machine will turn "OFF."

To adjust the temperature or time settings, simply press the "UP" or "DOWN" arrows to change the values.

As the temperature is warming up from a cold start, the temperature digits will be RED when the heat platen temperature is more than 10 degrees away from desired set point temperature.

When the platen temperature is less than 10 degrees, but more than 5 degrees from the desired set point the temperature displayed will be YELLOW.

When the platen temperature displayed is within 5 degrees of the desired set point, the temperature digits will be GREEN.

When the actual platen temperature reaches the set point, the controller will BEEP.
3. A little "Red Dot" shown above in the lower left corner of the temperature display window represents the "Heat Light." This indicator will be on when the controller is applying power to the heating element. It is normal for this indicator to flash on and off as heat is required.

## USER ADJUSTABLE SETTINGS

## USER ADJUSTABLE SETTINGS

Pressing the "GEAR" Icon in the upper left corner of the Home Screen will switch the screen to the user settings menu, shown below.

Pressing the "Back Arrow" Icon in the upper left corner of the display will take you to the previous screen.

Pressing the "Home" Icon in the upper right corner of the display will take you to the "HOME" Screen.

Pressing any of the USER SETTINGS buttons will take you to one of the screens shown below where you can adjust the machine settings to your preferences.

Once you have made the desired adjustments, press the "Back Arrow" or "Home" Icon.
Any changes in any of the settings or values you have made will be automatically stored as you leave that screen.

## MACHINE PRESETS

## PRESETS FOR TIME \& TEMPERATURE SETTINGS

The controller has several Time and Temperature Preset options (No Presets, Two Presets, Four Presets, Toggle Two Presets) which are selectable in the "User Adjustable Settings" as outlined on the previous page.

## ON THE HOME SCREEN

If one of the buttons is "GREEN" then that button is the ACTIVE time and temperature preset on the controller. See below:

2 presets option

4 presets option

If you wish to make an adjustment to the time or temperature, simply press the UP/DOWN arrows next to the Time or Temperature values to change the number to the new setting desired.

NOTE: You will notice when you change either the Time or the Temperature away from the preset values, all the preset buttons will turn "Gray."

To store the new Time or Temperature value(s) in a preset button location, simply press and HOLD on the desired preset button for 2 seconds. Once the new values are stored, the button will turn GREEN and the controller will BEEP to acknowledge the new values are stored.

To "recall" a preset, simply touch on the desired preset button and the Time and Temperature setting stored in that location will be recalled and displayed in the Time and Temperature values.

## PRESSING DOUGH

## PRESSING DOUGH

Your dough press is designed for easy use and operation to reliably press dough balls. Thickness, shape, and size are directly related to your dough ball, its shape, the temperature of the dough, the recipe of your dough, the type of lubricating food oil, as well as the settings of your machine. You should experiment with the following for the results you want.
CAUTION: Excessive pressure can cause structural damage, voiding the machine warranty!

1. Touch the power button located on the front of the control panel.
2. Set the desired temperature on the time/temperature control panel as instructed in this manual. Generally $110^{\circ}-130^{\circ} \mathrm{F}$ for room temperature dough and $140^{\circ}-150^{\circ} \mathrm{F}$ when using refrigerated dough. When the actual platen temperature reaches the set point, the controller will BEEP.
WARNING: Never attempt to press frozen dough. Personal injury and damage to your machine could result!
NOTE: This symbol represents "Hot Surfaces"

3. With the press in the open position, adjust the press to the desired thickness by turning the thickness control knob located at the top of the press. Thickness is reduced by turning the knob clockwise. Thickness is increased by turning it counterclockwise.

NOTE: The numerical thickness setting are for reference only and have no specific value to the thickness of a pressed or finished product.

NOTE: Adjustments may be required from one product to another and will vary to achieve the desired result.

WARNING: Make all adjustments while press is open. Adjusting the thickness while under pressure will result in damage to the press.

## PRESSING DOUGH

4. Lightly lubricate the lower platen with olive oil, food/cooking oil or other food release lubricant when pressing pizza dough. Place corn tortilla dough balls between sheets of parchment paper.

TIP: Dough balls at room temperature give you the best results.
5. Place your dough ball in the center of the lower platen and add a small amount of your food lubricant to the top of the dough ball. Do not add flour or dust with flour.
6. Pull down the handle all they way, applying pressure, until it stops.
7. After the designated time has elapsed (generally, 3-10 seconds for room temperature dough) raise the handle all the way up to the open position.

CAUTION: Excessive pressure can cause structural damage, voiding the machine warranty!
8. Remove your flatened dough and place on a screen or pan with the top side face down. You are now ready for final shaping, edging, and toppings. Tortillas can be moved to a tortilla warmer or skillet for finishing.
9. Move on/off switch to "OFF" when finished using the press for the day. This will turn the power off to the entire machine.

| DOUGH BALL WEIGHTS |  |  |  |
| :---: | :---: | :---: | :---: |
| Pizza Crust Size | Weight of the Dough Ball | Tortilla Crust Size | Weight of the Dough Ball |
| $6^{\prime \prime}$ | $5-8 \mathrm{oz}$. | $6^{\prime \prime}$ | $1-1.5 \mathrm{oz}$. |
| $8^{\prime \prime}$ | $6-10 \mathrm{oz}$. | $8^{\prime \prime}$ | $1.5-2.5 \mathrm{oz}$. |
| $10^{\prime \prime}$ | $8-12 \mathrm{oz}$. | $10^{\prime \prime}$ | $2.5-3.25 \mathrm{oz}$. |
| $12^{\prime \prime}$ | $16-18 \mathrm{oz}$. | $12^{\prime \prime}$ | $3.25-3.75 \mathrm{oz}$. |
| $14^{\prime \prime}$ | $18-20 \mathrm{oz}$. | $14^{\prime \prime}$ | $4-4.5 \mathrm{oz}$. |
| $16^{\prime \prime}$ | $20-22 \mathrm{oz}$. | $16^{\prime \prime}$ | $4.5-5 \mathrm{oz}$. |
| $18^{\prime \prime}$ | $22-24 \mathrm{oz}$. | --- |  |

## DOUGH SHRINKAGE

Ways of Overcoming this Problem:

1. Recipe - What is the percentage of water content in the dough? What is the percentage of oil content in the dough?
2. Mixing - Mixing procedure, such as water temperature and mixing speed.
3. Dough Preparation - What is the time between mixing and pressing? How is the dough being stored?
4. Pressing - What is the temperature of the dough when pressing? What is the temperature of the press when pressing? How long is the dough being pressed?

## HANDLE BRACKET POSITION

The handle bracket will be in shipping position when received. In order to use the handle bracket to swing the lower platen receiver, you will need to position the handle bracket for use.

2. Loosen (2) bolt only enough to allow the bracket to pivot.

3. Slide the handle bracket to the left, so that the holes line up. Replace (2) bolt and lock washer and tighten.

## FAQs

## PIZZA DOUGH

Q: Why won't my dough press to size?

- Weight of the dough ball - not enough dough
- Temperature of the dough ball might be cold - higher temp/longer press time
- Set to thick - change thickness setting

## Q: When I press my dough it gets sticky? Why?

- Very wet dough - turn up temperature
- Platens are not clean - possible flour build up

Q: Why won't my dough press out even?

- Unlevel platens

Q: Why is my dough tearing when I press?

- Usually this is caused by under mixing the dough in the mixer - mix on slow speed for a minimum of 10 minutes
- Cold or frozen particles in the dough

## Q: What temperature should I be pressing the dough?

- Cold dough could vary from $130^{\circ} \mathrm{F}$ to $170^{\circ} \mathrm{F}$
- Warm dough or room temperature dough $100^{\circ}-110^{\circ} \mathrm{F}$

## Q: How long should I be pressing the dough?

- Warm dough 2-7 seconds
- Cold dough 5-10 seconds

## Q: Will the heat kill the yeast?

- NO - yeast dies at $180^{\circ} \mathrm{F}$ for 2 -minutes - The temperature we are pressing could range from $100^{\circ}-170^{\circ} \mathrm{F}$ for a maximum pressing time of 10 seconds. This will not affect the yeast in the dough.
Q: Is $18^{\prime \prime}$ the only size crust I can get with this press?
- No - The weight of the dough ball and your thick \& thin setting will determine the size of your crust. Different dough ball weights will determine the size of your crust.

## Q: How do I get an edge with the press?

- Press out dough normally - (2) ways you can get an edge...
a. After pressing crust, form edge by hand
b. When saucing crust leave a $1 / 4^{\prime \prime}$ to $1 / 2^{n}$ ring from the edge to let your oven bake the edge naturally for a nice handmade look.

## FAQs

## TORTILLA DOUGH

## Q: Why won't my dough press to size?

- Weight of the dough ball - not enough dough
- Set to thick - change thickness setting
- Dirty or unclean platens

Q: Why won't my dough press out even?

- Dough ball placement
- Unlevel platens

Q: Why is my dough coming apart when I press it?

- Pressing too long with too much heat
- Not enough oil on dough ball
- Build up on platens

Q: What temperature should I be pressing at?

- $275^{\circ}-325^{\circ} \mathrm{F}$

Q: How long should I be pressing the dough?

- 2-3 seconds

## Q: Can I press corn tortillas?

- Yes - but you need to use either parchment or baking paper.
a. Place paper down on the platen
b. Place dough ball(s) on paper
c. Place another sheet of paper on top of dough ball(s)
d. Press

## Q: Can I cook the tortillas on the press?

- Yes - cooking the tortillas on the press can be done in the following manner
a. Set press temperature $275^{\circ}-325^{\circ}$
b. Press dough ball(s) 2-3 second press
c. Lift handle and leave tortillas on lower platen for 1-1:30 min.
d. Turn tortillas over and leave on lower platen for 1-1:30 min. on second side.
e. Remove

NOTE: For faster production and a better finished product, it is recommend to use a two step process using a tortilla press and tortilla warmer.

## LEVELING INSTRUCTIONS

## TOOLS REQUIRED

- 5/16" Hex Wrench
-3/8" Socket Drive Ratchet
- $5 / 8$ " Socket, Flat Blade Screwdriver

1. Remove the existing four hole plugs using a flat blade screw driver. Be careful not to scratch the surface of the platen mount during plug removal. The caps will be reinstalled after the leveling adjustment is complete.

2. Lower the Top Platen until one side touches to determine which side will be adjusted. In the picture below, the front of the platen could be raised or the back could be lowered.

## LEVELING INSTRUCTIONS

3. On the chosen adjustment side (which is the front in this example), loosen the front hex set screws using a $5 / 16$ " hex wrench. Note: When adjusting always loosen at least 2 hex screws adjacent to each other.

4. Adjust the front height of the upper platen up by turning the adjustment nut counter clockwise. Turning the adjustment nut clockwise will lower the front of the platen. Adjust in 180 degree increments, alternating between the two nuts being adjusted.
5. After each adjustment, tighten the hex set screws and then lower the top platen and recheck to see if both are level. In the picture below, the platens are level. Tighten all set screws and test with dough to insure platens are level.

## TROUBLESHOOTING

## TIMER WON'T GOUNT DOWN

## PRESS IS NOT PRESSING DOUGH ENOUGH

## CLIEANING \& MAINTENANGE

WARNING: Before cleaning, performing maintenance or repairs make sure the machine is turned off and the machine is unplugged.
***This appliance is not waterproof. Never spray or pour water or any other cleaning solution onto this appliance.***

## CLEANING ALUMINUM UNCOATED HEAT PLATEN(S)

1. Unplug the machine and allow it to cool.
2. Open the heat platen for easier access.
3. Dampen a nonmetallic scrubbing sponge with a mild soap or detergent to remove any excess material from the heat platen(s).
4. Wipe clean with a dry cloth.

## CLEANING PTFE (XYLON) COATED PLATEN(S) (OPTIONAL FEATURE)

1. Unplug the machine and allow it to cool.
2. Open the heat platen for easier access.
3. Clean the PTFE coated platen with a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners or any other kind of abrasive material. This will damage the coating.
4. Wipe clean and dry with a cloth.

## CLEANING OUTSIDE SURFACES OF THE MACHINE

Use a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners or other abrasives that will damage the painted surface.
*TX \& D-TX Series dough presses are available in White or Stainless Steel housings.*

## LUBRICATION

Your press requires lubrication every 15,000 cycles or every 6 months. Use NSF/NLGI2 rated food grade grease (such as Bel-Rey No-Tox \#2 or equivalent). Lubrigate all moving or hinged points.

## CIRCUIT BREAKER RESETTING

Should the circuit breaker trip, simply allow the machine to cool for 2 minutes and then reset the circuit breaker by pressing the button back in to allow the machine to come back on. If the circuit breaker continues to trip, have an electrician diagnose the cause of the fault.

## WARRANTY

BEFORE warranty repair you MUST get Prior Authorization: Call 1-800-835-0606 Warranty will be voided otherwise.
doughXpress ${ }^{\circledR}$ ) will automatically register the equipment on the date it was shipped to you or your distributor. If the equipment was not purchased directly from HIX, but through a distributor (either domestic or foreign), please keep a copy of their sales invoice showing the serial number and date it was sold/shipped to you with this warranty.

In this case, we will use the distributor's invoice date as the beginning warranty date. STAPLE A COPY OF YOUR RECEIPT TO THIS WARRANTY and keep in a safe place to provide verification of your warranty should a problem occur. Thank you.

Please fill in the following information and attach a copy of your receipt for your records.
Date Purchased: $\qquad$ From:
Model \#: $\qquad$ Serial \#:

This warranty applies to equipment manufactured by the HIX Corporation (HIX), Pittsburg, Kansas, U.S.A. HIX warrants to the original purchaser, the full line of doughXpress® product against defects in workmanship and material, except for wear and tear for a period of one year parts and labor limited warranty on most items, there are selected items which may carry a two year warranty (refer to owners manual.) All dough press carts, compressors, and accessories are warranted for 90 days from the date of purchase. Repairs include parts and labor only, excluding is the following:

1. Overtime Labor Rates
2. Expedited Freight for Parts
3. doughXpress ${ }^{8}$ assumes no responsibility for down time or loss of product. All defective parts must be returned to doughXpress $®$ for credit. Repairs must be pre-authorized by doughXpress $®$ prior to work commencing.
4. Travel time is not covered by dough $X$ press $®$, unless pre-authorized by doughXpress $®$. In the event of a defect, doughXpress $®$, at its option, will repair, replace or substitute the defective item at no cost during this period subject to the limitations of insurance and shipping costs stated below.

This warranty does not cover normal wear and tear, damages due to accident, misuse/abuse, alterations or damage due to neglect, or lack of proper lubrication or maintenance. doughXpress® shall not be responsible for repairs or alterations made by any person without the prior written authorization by dough $\times$ press ${ }^{\circledR}$, This warranty is the sole and exclusive warranty of doughXpress $®$ and no person, agent, distributor, or dealer of doughXpress $®$ is authorized to change, amend or modify the terms set forth herein, in whole or in part.

In the case of a problem with the equipment identified herein, doughXpress ${ }^{\circledR}$ should be contacted during regular business hours to discuss the problem and verify an existing warranty. dough Xpress $\mathbb{R}^{8}$ personnel will assist the customer to correct any problems which can be corrected through operation or maintenance instructions, simple mechanical adjustments, or replacement of parts. In the event the problem cannot be corrected by phone, and upon the issuance of a return authorization by dough $X$ press $®$, the equipment shall be returned to doughXpress $®$ or an authorized service representative. All insurance, packaging and shipment/freight costs are solely the responsibility of the customer, and doughXpress ${ }^{8}$, shall not be responsible for improper handling or damage in transit.
doughXpress $®$ customer service personnel may be contacted for complete return authorization and reconditioning information. This expressed warranty is given in lieu of any and all other warranties, whether expressed or implied, including but not limited to those of merchantability and fitness for a particular purpose, and constitutes the only warranty made by doughXpress $®^{8}$. In no event shall doughXpress $®^{\circledR}$ ' liability for breach of warranty extend beyond the obligation to repair or replace the nonconforming goods. dough $X$ press $®$ shall not be liable for any other damages, either incidental or consequential, or the action as brought in contract, negligence or otherwise.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.
