

Tortilla Warmers

Nothing entices the appetite better than the smell of fresh, hot tortillas. The doughXpress® TXW line of tortilla warmers work alone or coupled with a doughXpress® tortilla press for a complete tortilla package. After pressing the tortillas, finish them off on a tortilla warmer. Each warmer is designed to heat evenly and reach temperatures of 425°F (218°C) giving those tortillas a fresh tortilla taste and smell.
