

## Manual Screen Printers

*High Quality Components • Upgradeable Value*

# Manual Screen Printers

For over 60 years HIX® has been manufacturing the highest quality, state-of-the-art manual screen-printing equipment for anyone from the small start-up shop to the fully equipped professional that's serious about their business making a profit in the textile graphics industry without them having to invest in a high-priced automatic printer shop.

We've designed the Premier printer line to grow as your business does. Each model can be upgraded to the next level of colors and/or stations up to a 6 color/6 station printer. Because all HIX printers use the same parts, each can be expanded

Premier 4C/1S

Premier 4C/4S

## Features:

- True all-heads-down printer. The industry standard for over 60 years.
- Upgradeable from the bench top 4C/1S printer to the floor standing 6C/6S.
- All machined aluminum components are cast in our own HIX foundry.
- No welds are used in the construction of the heavy duty central print head and arm carousels.
- Precise, exact angles between the color heads and print arms.
- One time registration - no corrective adjustments are needed during the print-run.
- Pairs well with the HIX® manual and auto flash cure units.
- Smooth and accurate micro-registration allows for precise screen adjustments. Ratchet handles are used to lock the screens firmly in position.
- Gas shocks are used instead of the traditional springs to provide a smooth and sequential lift of the screens, avoiding a sudden uplift of the screens after each print stroke.
- With the heads in the up-position the screens remain near-horizontal. This makes them easy to grab, the squeegees remain in place, and ink does not migrate inside the screen.
- A variety of optional rubber-topped aluminum shirt-boards and sleeve shirt-boards are available that are resistant to flash curing.

# Manual Screen Printers

with a variety of HIX shirt boards, specialty platens, side clamps, and air assist.

HIX® Premier® printers are the evolution of decades of engineering expertise. Constructed with a heavy-duty steel base, the HIX in-house cast and machined aluminum components provide a level of quality unmatched by any welded steel printer on the market today. The all heads down design and extremely precise micro-registration accelerate your jobs to put more time in your day and profit in your wallet.
