

VALUE SERIES Heat Transfer Machines

Quality • Performance • Value

VALUE SERIES

In today's market there are many cheap imported heat presses available to choose from but there's absolutely no need to settle for an inferior quality press that's not going to last. For many years HIX® has been manufacturing the Value Series line of analog presses that are affordable for anyone that is budget minded.

Although they aren't designed for the high-volume production shop, they are manufactured right here in the USA in the same factory as our EVO Series Digital Presses and carry the HIX® name as our guarantee on quality. This line of heat presses fit very well into the smaller scaled environments such as the hobbyist, schools, churches, non-profit organizations, fundraisers, or simply as a back up for one of our digital presses. Their lower weight and size make them ideal for taking to any indoor or outdoor venue.

The SwingMan-15 analog heat press is the most economical choice for textile transfers and small format sublimation. The swing-away design keeps the hot surfaces away from your hands and arms while setting up the job and with its heavy-duty frame and structure is recognized as one of the most reliable heat presses on the market today. It uses the same lifetime warrantied heating element as our EVO models.

Value Series SwingMan-15
(manual swing away press)

(shirt not included)

Features:

- All Metal Construction
- Analog Full Range Heat Control up to 400°F
- Separate Digital Timer Included
- 15" x 15" platen sizes
- Compatible with Textile & Non-Textile Substrates
- Lifetime warranty on the Heating Element

Manual | Analog - Heat Transfer Machines

The HT-400e analog clam shell heat press is manufactured from robust all steel construction. The large substrate clearance allows it to handle any job with a maximum work surface of 15" x 15". This is a heavy-duty affordable press for the budget minded business. It uses the same lifetime warrantied heating element as our EVO models.
