SwingMan 15

Key Features

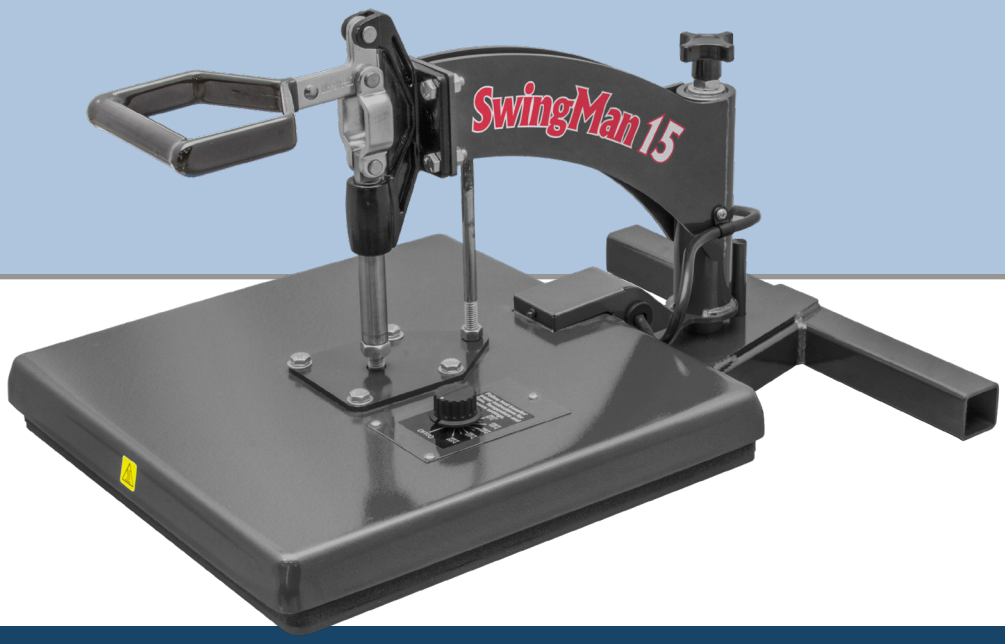
Production
The SwingMan 15 offers the ability to do garment transfers ranging from youth to XL adult sizes, and accepts substrates up to 1-3/4" thick. The capability to imprint tiles, license plates, and mouse pads are all now available to you!

Swing Away
Right swing-away design. The swing-away design gives straight down pressure needed for tiles, plaques, and other items.

Design
Recognized as one of the most reliable small format swing-away heat transfer presses on the market, this unit packs a lot of punch. At the heart of the SwingMan 15 is a 15"x15" lifetime guaranteed cast-in heating element with a swing-away design that keeps the hot surfaces away from your hands and arms. It's engineered with a sturdy steel design and an easy-adjust pressure control, full-range temperature settings from off to 400°F, a heat indicator light, and a separate handheld digital timer.

Overview

The SwingMan 15 makes press transfer applications virtually unlimited – you can transfer to garments, mouse-pads, glass-cutting boards, plaques, ceramic tiles, and so much more! This makes it especially perfect for those mobile shops at races, concerts, state fairs, and any event where you can make money!



Specifications
